

ASHOK KUMAR DUBEY

Surwan Dalapur, Manda, Meja, Prayagraj, Uttar Pradesh 212104 | +91 8081656208 | ashok8081d@gmail.com

PROFESSIONAL SUMMARY

Third-year Computer Science undergraduate with hands-on full-stack development experience using the MERN stack (MongoDB, Express, React, Node.js) and a strong, consistently practiced foundation in Data Structures and Algorithms using C++. Built and deployed a complete e-commerce platform from scratch, including authentication, payments, and real-time features. Fast learner who takes a deeply analytical approach to problem-solving, with demonstrated ability to lead project work and grow quickly from feedback.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.9 / 10

Senior Secondary (Class XII)

Percentage: 76.6% (383 / 500)

Secondary (Class X)

Percentage: 90.6%

TECHNICAL SKILLS

Languages: C++, JavaScript, Python (basics), Java (basics)

Frontend: React.js, Redux Toolkit, Tailwind CSS, React Router

Backend: Node.js, Express.js, REST API design, JWT Authentication, bcrypt

Database: MongoDB, MongoDB Atlas, Mongoose

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Socket.io, Razorpay API

Core CS: Data Structures & Algorithms (DSA), Problem Solving (LeetCode)

PROJECTS

ShopSphere — Full-Stack E-Commerce Application

MERN Stack | React, Node.js, Express, MongoDB, Redux Toolkit

- Built a full-stack e-commerce platform with product catalog, cart, and order management using React, Express, and MongoDB Atlas.
- Implemented secure user authentication using JWT and bcrypt password hashing, including protected routes on both client and server.
- Designed global state management for authentication and cart features using Redux Toolkit, and handled API communication using Axios with interceptors for token handling.
- Integrated Razorpay payment gateway to enable secure, real-time order checkout and payment processing.
- Added real-time order and notification updates using Socket.io, and built an admin dashboard for managing products, users, and orders.
- Styled a fully responsive UI using Tailwind CSS and deployed the application with the frontend on Vercel and backend on Render.

TaskFlow — Project Management Tool (Trello/Jira-style)

MERN Stack | Focus: Authentication Security & System Design

- Architecting a Trello/Jira-style project management tool with a modular Express and MongoDB backend, implementing secure JWT-based authentication using HTTP-only cookies to prevent client-side token exposure.

PROBLEM SOLVING / CODING PRACTICE

- Practicing Data Structures and Algorithms in C++ on LeetCode, covering arrays, hashmaps, recursion, linked lists, stacks, queues, and strings.
- Follow a structured, topic-wise approach: learn the concept, solve practice problems, and review for optimization before progressing to the next topic.

SOFT SKILLS

Fast Learner • Deep Thinker • Complex Problem Solving • Team Leadership • Learns from Mistakes • Hardworking & Consistent
