PROFESSIONAL SUMMARY

Third-year CS undergraduate with hands-on MERN stack experience and a strong DSA foundation in C++. Built and deployed multiple real-world projects including an e-commerce platform and an AI-powered multi-agent pipeline using the Grok AI API. Certified by NPTEL, Ethnus, and Oracle. Fast learner with an analytical approach to problem-solving and demonstrated ability to lead project work.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

CGPA: 8.9 / 10

Senior Secondary (Class XII)

Percentage: 76.6% (383 / 500)

Secondary (Class X)

Percentage: 90.6%

TECHNICAL SKILLS

Languages: C++, JavaScript, Python (basics), Java (basics)

Frontend: React.js, Redux Toolkit, Tailwind CSS, React Router

Backend: Node.js, Express.js, REST API design, JWT Authentication, bcrypt

Database: MongoDB, MongoDB Atlas, Mongoose

AI / APIs: Grok AI API, Multi-Agent System Design, LLM Integration

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, Socket.io, Razorpay API

Core CS: Data Structures & Algorithms (C++), Problem Solving (LeetCode)

Soft Skills: Fast Learner • Analytical Thinker • Complex Problem Solving • Team Leadership • Hardworking

CERTIFICATIONS

Cloud Computing — NPTEL Online Certification

Marketing Analysis — NPTEL Online Certification

AWS Cloud (Online Internship Course) — Ethnus

Oracle Cloud Infrastructure Data Science — Oracle — Proctored Examination

PROJECTS

ShopSphere — Full-Stack E-Commerce Application

MERN Stack | React, Node.js, Express, MongoDB, Redux Toolkit | Vercel + Render

- Built a full-stack e-commerce platform with product catalog, cart, and order management; deployed end-to-end on Vercel and Render.
- Implemented JWT + bcrypt authentication, Redux Toolkit state management, and Axios interceptors for secure API communication.
- Integrated Razorpay payment gateway, real-time order updates via Socket.io, and an admin dashboard for managing products and users.

AI Agent Pipeline — Multi-Agent Optimization System

MERN Stack | Grok AI API | Multi-Agent Architecture

- Built a full-stack AI agent pipeline using the MERN stack, integrating the Grok AI API to fetch and process data through a coordinated multi-agent system.
- Designed an optimization layer where multiple agents collaborate to analyze, process, and route tasks automatically, reducing manual intervention.
- React frontend with real-time agent status updates; Node.js/Express backend handles API orchestration with MongoDB for task and session persistence.

TaskFlow — Project Management Tool (In Progress)

MERN Stack | JWT Security | HTTP-only Cookies

- Architecting a Trello/Jira-style tool with secure JWT-based auth using HTTP-only cookies and a modular Express + MongoDB backend.

PROBLEM SOLVING

- Practicing DSA in C++ on LeetCode — arrays, hashmaps, recursion, linked lists, stacks, and queues — using a structured topic-wise learning approach.
